

Btrieve System Requirements

Recommended hardware and software specifications *** for Yardi Btrieve products. Yardi Systems, Inc
June 2006

MINIMUM CLIENT WORKSTATION SPECIFICATIONS

Operating system	Microsoft Windows 95, Windows 98, Windows 2000, Windows NT, or Windows XP * (Windows ME is not compatible.)
Free Conventional memory	605 KB **
Processor	Intel Pentium, 120 MHz or faster
Free hard disk space	200 MB available
RAM	64 MB; 128 MB for Windows NT, Windows 2000 and Windows XP

RECOMMENDED NETWORK SPECIFICATIONS

Network operating system	Novell NetWare 3.12, 4.1X or 5.1 , Microsoft Windows NT 3.5 or 4.X, Windows XP Professional *, Windows 2000, or Windows 2003 *
Processor	Intel Pentium, 120 MHz or faster
Free hard disk space	1 GB minimum available
RAM	512 MB to 1 GB

- These recommendations are for Yardi software version 3.X that was available at the time of this publication. As newer versions are introduced, Yardi reserves the right to update and modify these recommendations.
- Yardi recommends using a dedicated Btrieve server. If the server will be running additional applications, the specifications should be increased accordingly.
- Yardi does not recommend running a Yardi Property Management database over a peer-to-peer network (however, in low volume situations with only 2-3 users, performance *may* be acceptable). There are greater demands on workstations in a peer-to-peer environment, so you may have to exceed minimum requirements for this networking mode.
- Yardi Advantage and Professional products are not compatible with Pervasive SQL Server Engine version 8.x, but are compatible with versions 6.x and 7.x of the Pervasive Server Engine.
- Certain older versions of the Windows operating system may no longer be supported by Microsoft. Contact Microsoft technical support for information about support for older versions of Microsoft products.
- Yardi does not guarantee property management product or Btrieve database compatibility with printers using a USB connection. Yardi recommends using either a parallel, parallel adapter, or network connection.
- Hardware, memory, and storage requirements can vary greatly, depending on the number of users, network applications, hard disk sizes, connection type, and other issues. Your organization should regularly review company hardware and software resources compared to current requirements.
- Yardi recommends the use of backup and security components for hardware, data, and application redundancy. This includes backup servers for your database, file, and application servers, as required. In case of catastrophic server failure, backup servers allow users to work with minimal interruptions in database and application services. In addition, you should use backup devices for storing your database backup files. Good security practices also require the use of standard security hardware and software, such as corporate firewalls and utilities for protection against computer viruses. Configuration of hardware and application security is the responsibility of the client.
- For computer and peripheral requirements and resources in your organization, contact your system administrator or computer consultant. For additional information and updates on Yardi system requirements, contact your Yardi account manager or implementer.

(*) Yardi Systems has completed limited testing of Windows XP and Windows 2003 with our Btrieve products, with successful results. However, if hardware or software conflicts occur, it may be necessary to migrate to a different operating system in order to use the Yardi Btrieve product. The Windows XP Professional version is required for a network environment. Yardi does not guarantee Btrieve product compatibility with these operating systems.

(**) Windows 95 and 98 may require some memory optimization procedures. Please contact Yardi technical support for details.

(***) System requirements presented herein are accurate and reliable to the best of Yardi's knowledge and belief but are not guaranteed to be so. These requirements are subject to change without notice.
